

When filling out this worksheet, consider what sort of organisational resources would be needed to do the following;

- **Communicate the project to internal and external stakeholders:** Have there been any difficulties with this in the past? Are parts of this particularly challenging? What would help improve this in future?
- **Collaborate with external stakeholders and affected users:** What challenges have there been in the past? Do you have any ideas on how to get around these? What would you need to do this?
- **Long-term support:** What long-term support needs would help create fairer algorithmic systems?

Resources to communicate project

Resources to collaborate with stakeholders

Resources to ensure long-term support

When filling out this worksheet, consider what sort of organisational resources would be needed to do the following;

- Changes which could be made for the current project.
- Changes which could be made to the current project which acts as a stepping stone to long-term change.
- Changes for long term change

Changes for current project

Steps to long-term change

Changes for long term change
